DETAILED ACTION

Response to Arguments

1. The amendments to the claims overcome the previous 35 USC §112 rejections which are hereby withdrawn. The amendments to the specification overcome the previous objections which are hereby withdrawn. However, there does not appear to be a separate Brief Description of the Drawings and Detailed Description section, therefore a new objection is made below.

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).

Art Unit: 2622

- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

It is noted that a items (h) and (i) in the list above appear to be combined into a single item in the present specification.

Drawings

2. The drawings were received on 04 August 2008. These drawings are accepted.

Claim Objections

3. Claim 10 is objected to because of the following informalities:
- a. lines 11 and 12 on page 5 of the present amendment, claim 10 claims calculating a target signal value q as " $g = \dots$ ". Please change to " $q = \dots$ ".
 - b. claim 11 as currently written is dependent on itself (i.e. "method according to claim 1 wherein"). It is believed claim 11 should depend from claim 10.

Appropriate correction is required.

4. Claim 6 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 6 seems to claim the use of the same formula as claimed in claim 10, only written in a different form.

Claim Rejections - 35 USC § 103

Art Unit: 2622

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson (US 6,177,957)

[claim 9]

7. Regarding claim 9, Anderson discloses a device for processing camera images which includes a general purpose CPU (Figure 3, Item 344) which receives captured images and processes the images according to defined routines (Figure 11). The routines of Anderson are interchangeable (Figure 11). Claim 9 as written requires that the device be "suitable for" carrying out the method of claim 10. Since the device of Anderson includes a programmable processor which may be freely reconfigured as necessary, it is believed that the device of Anderson is "suitable for" carrying out the method as claimed. While Anderson discloses the use of a CCD image sensor instead of a CMOS image sensor, Official Notice is taken that the use of CMOS image sensors in place of CCD image sensors is well known in the art and allows for easier integration of the image sensing device with image processing circuitry since CMOS image sensors do not required specialized manufacturing steps which are required to produce CCD image sensors.

Allowable Subject Matter

8. Claims 10, 11 and 2-8 are allowed, however the claim objections above must be overcome before the claims can be passed to issue.

[claims 10, 11 and 2-8]

9. Regarding claims 10, 11 and 2-8, while it is known in the prior art to correct for afterglow effects during image capture, the prior art does not teach the use of the specific method and equation as claimed.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

ii.	Crawford et al.	US 5,644,610
iii.	Hsieh	US 6,295,331

v.	Levinson	US 5,517,544
vi.	Nagaoka et al.	US 7,003,071
vii.	Shinotsuka	US 2005/0104978

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
